

## Characterization of compounds isolated from the rhizome of *Cissus repens*

The rhizome of *Cissus repens* Weight & Arn. was collected by Daw Myint Myint Khine in June 2002 at Taung-gyi, Shan State, Myanmar. The species was identified at Department of Botany, University of Yangon. Extraction and isolation were carried out in Germany for her PhD thesis. The following phytochemicals were isolated and mentioned in her dissertation.

Bergenin

Isolariciresinol

$\beta$ -D-glucopyranoside
